

The World Leader in High Performance Signal Processing Solutions

# Mark Martin

**Vice President and General Manager  
Micromachined Products Division  
Analog Devices**

**Globalpress Economics Summit**

**San Francisco, CA**

**March 30 to April 2, 2009**

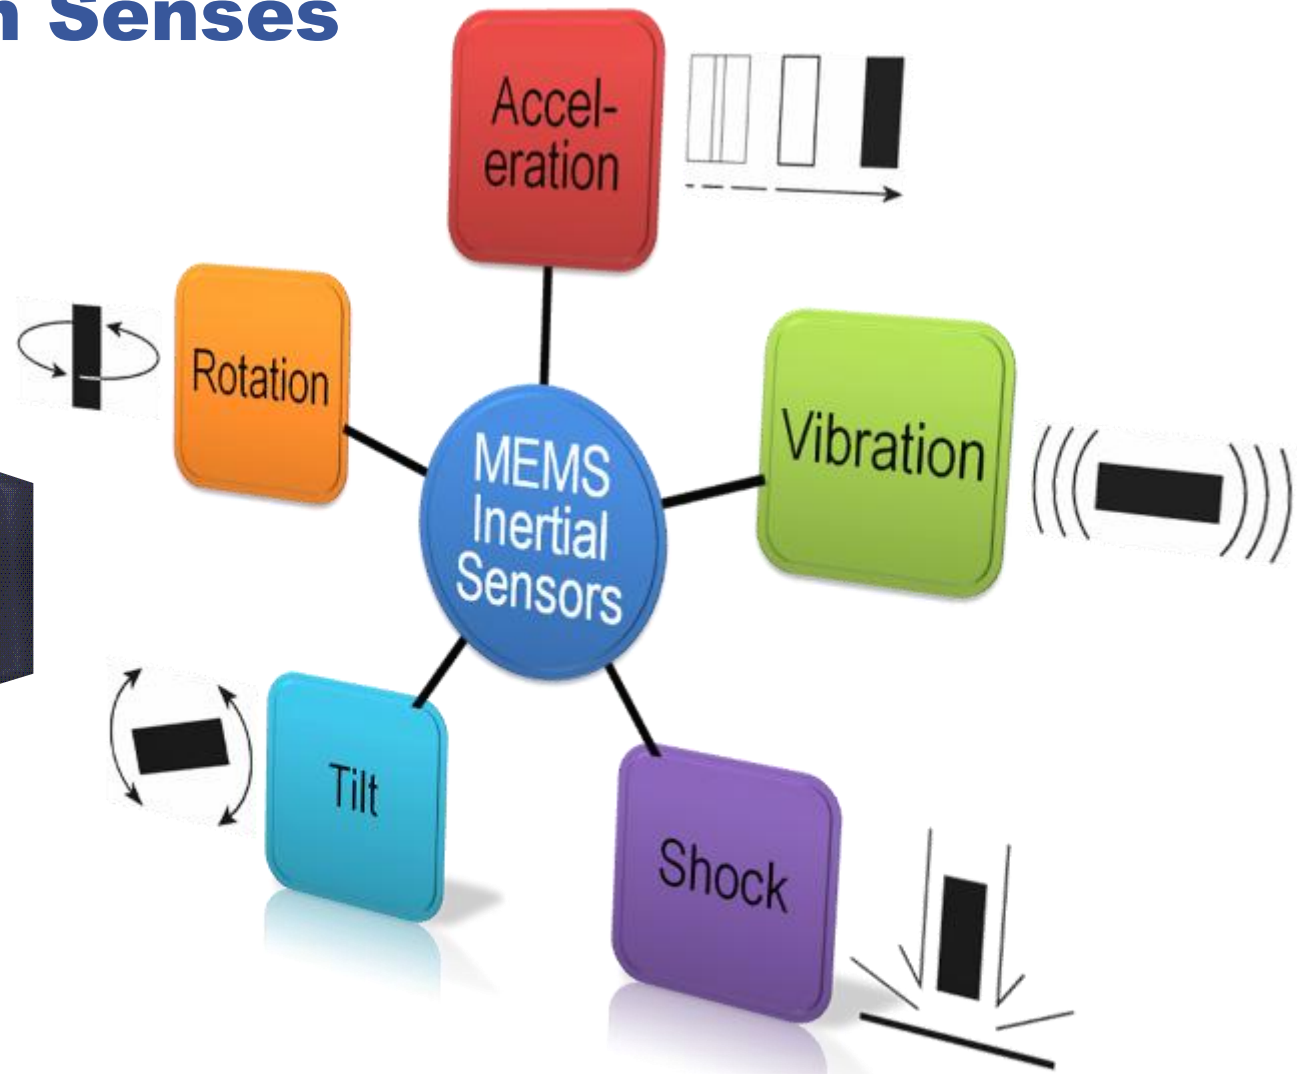

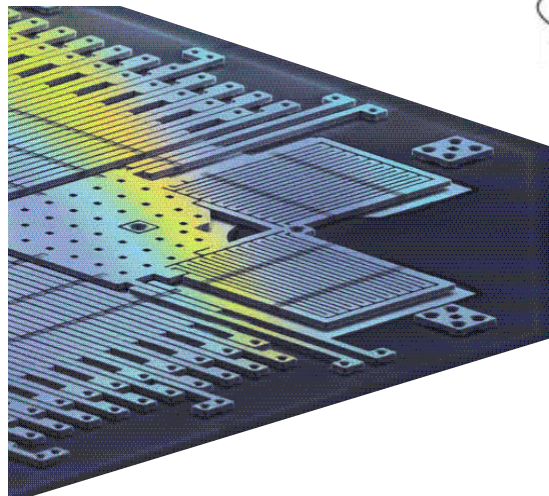

# The Macro Trends

- ◆ Processing real-world analog signals has become a major growth driver for the semiconductor industry,
  - MEMS sensors are a quickly growing part
- ◆ Motion sensing is making the human-device interface more natural, and products easier to use
- ◆ Motion sensing is enabling more monitoring and control capabilities

# Awareness Is Growing for The 5 Motion Senses

# The Result: Tremendous Growth Potential For New MEMS Devices/New Applications
